# Aspen T9 Carbon Cat 2026

Year: 2026

Length: 9 ft

Price: \$14,700

Located in: Burlington, WA US

Hull Material: Composite

Engine/Fuel Type: unleaded

YW# 4390808

## Make

Make: Aspen

## Measurements

Length Overall: 9.17 ft

Beam: 5.33 ft

## Engines

Total Power:

Year Built: 0

Engine/Fuel Type: unleaded

Engine Hours: 0

## Tanks

Fresh Water Tanks: 00Gallons

Fuel Tanks: 00Gallons

## General Boat Description

From the experienced boat building team at Aspen comes a new series of lightweight rigid tenders that are unlike any boat built before. Carbon Cat's unique patent in process hull form provides the stability of a catamaran or an inflatable RIB but utilizes lightweight carbon fiber construction making them fast, efficient and easy to handle.

The gunwale is finished with a thick foam bumper made with SeaDek HD for durability and to

eliminate scratches and abrasions. The seating area is also cushioned with SeaDek creating a softer surface and better grip.

The amazing Carbon Cat construction and design means that the power requirements should be 35% less than typical inflatables due to the hard bottom and hybrid cat hull shape. During sea trials the T11 reached a top speed of 21mph powered by a single 9.9hp Yamaha outboard. This is an incredible speed to HP ratio superior to other tenders.

Using more moderate horsepower increases fuel efficiency and reduces weight. This makes Carbon Cats and their engines easier to stow onboard and easier to launch and retrieve. Optional transom wheels make beaching the Carbon Cat even simpler.

T9:

- LOA: 9'2"
- Beam: 5'4"
- Hull Weight: 126 lb.
- Finished Weight: 132 lb. (estimate)
- Horsepower: 6 / 9.9
